

154 transactions

26,354 digits

Gladys Regalado
Copyleft 2019

On August 17, 2019, I scavenged receipts from convenience stores along my route from Makati to Quezon City.

Each receipt represents a transaction, a record of behaviour and location, the digital footprint of a snacking child or a commuter stopping by for drinks.

I reduced each receipt to its digits and visualized into an unrecognizable form – collect, process, visualize.

This is a catalog of the 26,354 digits from all 154 receipts.
